REASONS FOR ALLOWANCE

1. Claims 1-12 are allowed.

Claim 1 and 11 are allowed because the prior art of record fails to disclose or suggest a line driver including, in combination with other limitations, a first current source having a control end connected to the output end of the first op-amp or the voltage source via a first group of switches, a second current source having a control end connected to the output end of the second op-amp or the ground end via a second group of switches, a capacitor, a third current source having a control end connected to a first bias signal source or the voltage source via a third group of switches, and a fourth current source having a control end connected to a second bias signal source or the ground end via a fourth group of switches.

Claims 2-10 and 12 are allowed because they depend on claim 1 and 11, respectively.
